

Please tell the NAB to take a hike! If they were providing what the public wants for free why are we paying XM ten dollars a month for their service? Do not block a competitor from providing better service (local traffic reports 24/7) because the old boy on the block doesn't want to improve himself to meet the needs of the public. Your main mission is to protect and serve the public good by regulating the use of the airwaves isn't it? Again PLEASE do not block XM radio from providing a needed public service better than the local broadcasters ever did and never will.

Thank you .
